In our opinion, this good-quality stock has above-average potential for growth. In recent years, the company has been reducing its dependence on utility operations by diversifying into industry, shipping, and transportation. Earnings per share have grown at an impressive annual rate of 9.6% in the last five years, and dividends have been paid in increasing amounts each year since 1944.

INTERIM EARNINGS: In the first half of 1967, net income from operations amounted to \$8.8 million, or \$1.14 a share, up 14% in comparison with the \$1.00 a share earned in the 1966 first half. Results exclude gains derived from sale of properties and investments; the gains amounted to 11¢ a share in the latest half and 15¢ a share a year earlier. Second-quarter net was equal to 42¢ a share vs. 32¢ a share.

RECENT DEVELOPMENTS: The company's program of diversification into non-utility operations is continuing in 1967. An investment is being made in Divcon Inc., a Houston-based holding company that, by means of subsidiaries, provides underwater services to the international offshore petroleum industry. International Utilities will have a 30% equity interest in Divcon at a cost of \$750,000 and will spend up to

\$3 million on equipment. As the result of a share-purchase offer made in July 1967, the company has increased its investment in Echo Bay Mines Ltd. to 77%. Echo Bay, a private company, mines silver and copper in the Northwest Territories. Earnings for the year ended February 28, 1967, have been estimated at more than \$2.5 million, compared with \$611,000 for the preceding year. Preliminary studies are under way on the possibility of an exchange of stock by International Utilities Corp. for outstanding shares of General Waterworks Corp. General Waterworks is a successful investment holding company in the United States.

THE COMPANY: International Utilities operates primarily through its subsidiaries.

Major operations are the distribution of

natural gas and electricity, shipping, truck and bus transportation, and miscellaneous industrial activities. In addition, International maintains an active portfolio of investments. The following table demonstrates the proportion of net income derived from the various activities in the past two years. Excluded are gains from the disposal of properties and investments.

			1966	1965
Public Utilities			50.9%	59.9%
Shipping			13.3	8.3
Trucking	•		3.3	7.2
Industrial			11.6	10.2
Other Investment	S		20.9	14.4

INVESTMENT PORTFOLIO: The company maintains a securities portfolio that has made a significant contribution to earnings over the years. In fiscal 1966, the portfolio accounted for much of the \$4.4 million of interest and dividend income and of the \$2.2 million net capital gains. At the end of 1966, marketable securities had a book value of \$55.1 million and a market value of \$77.6 million. Combined gains from the sale of investments and properties have averaged 25¢ a share of International Utilities over the past ten years.

<u>UTILITY SUBSIDIARIES</u>: Utility operations are conducted by two natural-gas subsidiaries, an electric company, and a combined natural gas-electricity utility.

Canadian Western Natural Gas Co. Ltd. (87.7% owned) serves the cities of Calgary and Lethbridge, the town of Banff, and 82 other communities in southern Alberta. The operating area has a population of some 441,000. Revenues expanded in 1966, but because of cost increases net income declined to \$2.4 million vs. \$2.5 million a year earlier. In 1966 the company built a new \$2.5-million pipeline from the Jumping Pound West gas field to Calgary.

Northwestern Utilities Ltd. (wholly owned) distributes natural gas in the cities of Edmonton, Red Deer, Camrose, and Wetaskiwin, and in 88 other communities in certral Alberta. Population of the area is about 512,000. Net income available for the common declined in 1966, to \$3.2 million vs. \$3.5 million in fiscal 1965.

Northland Utilities Ltd. (99.6% owned) is a combined natural-gas and electricity operation. Natural-gas distribution extends to some 26 communities in northern Alberta and to three in British Columbia. The population served totals approximately 47,000. Electricity is supplied to 50 communities in

northern Alberta, the Northwest Territories, and Uranium City, Saskatchewan, with a combined population of some 38,000. The large new Rainbow Lake Oil field, discovered in 1965, is in Northland's operating area. Net income available for the common rose slightly in 1966, to \$612,900 vs. \$610,700 in fiscal 1965.

Canadian Utilities Ltd. (72% owned) serves a population of about 172,000 in an area consisting of 261 communities in central and northern Alberta, one in Saskatchewan, and 15 in the Yukon. Net income available for the common rose to \$2.2 million in 1966 vs. \$2 million the year before.

SHIPPING SUBSIDIARIES: International Utilities owns a group of subsidiaries known as the Gotaas-Larsen lines. The companies own or operate oil tankers, bulk carriers, and refrigerator ships. At the end of 1966, 30 ships were owned, operated, or on order. Net income from shipping operations rose by a substantial 74% to \$1.8 million in 1966. Interest income of \$1.1 million was paid to International Utilities or its affiliates on cash advances for shipbuilding and vessel improvements; that figure compares with only \$472,000 in 1965.

TRANSPORTATION SUBSIDIARIES

Ryder Truck Lines, Inc. (wholly owned). The trucking subsidiary was purchased by International Utilities in August 1965, and has since undergone management reorganization and a substantial plant-and-equipment modernization program. These programs adversely affected 1966 earnings, which were \$233,000 vs. \$534,000 in 1965, when no tax provision was necessary because of a tax loss carryforward. Ryder operates over regular routes in 16 states.

Canada Coachways Ltd. (wholly owned), together with its subsidiaries, operates bus routes in Alberta, British Columbia, the Yukon, and Northwest Territories. Canada Coachways acquired three small bus lines

in 1966, and at the year-end owned 130 units serving 8,000 miles of highway. IU's investment in Canada Coachways' capital stock and promissory notes was just under \$5 million at the end of 1966. Although earnings were unsatisfactory last year, effected economies are expected to be reflected in improved earnings in 1967.

INDUSTRIAL SUBSIDIARIES

International Utilities of the U.S., Inc. has two divisions, which operate under the former corporate names of Brown Brothers Contractors, Inc. and The Kaiser-Nelson Corporation. These divisions are engaged in the recovery of steel and iron scrap at steel plants, the processing of slag and crushed stone, and the sale of such products in Pennsylvania, Ohio, and New Jersey. A subsidiary, The Kaiser-Nelson Steel and Salvage Corporation, conducts demolition and salvage operations throughout the United States. In 1966 a Canadian affiliate, Kaiser-Nelson Demolition Ltd., was formed to conduct operations in Canada. International Utilities recently acquired a 51% interest in Standard Structural Steel Ltd., a Montrealbased fabricator and erector of structural steel. The price was not disclosed. Standard has enjoyed phenomenal earnings growth, with an average annual increase of 45% in per-share earnings over the past five years.

ANNUAL RESULTS: Net income, excluding gains on disposal of properties and investments, for the year ended December 31, 1966, amounted to \$13.7 million, 16% more than in 1965. Because of sharply higher preferred dividends, \$2 million in 1966 vs. \$178,000 a year earlier, earnings available for the common were \$1.71 vs. \$1.72 a share in 1965. Preferred dividends were higher in 1966 because a full year's payment was made on preferred stock issued late in 1965. The gain on the disposal of properties and investments in 1966 amounted to an additional 30¢ a share vs. 19¢ the year before, resulting in total net income of \$2.01 a share vs. \$1.91.

Revenues from natural-gas operations rose 4.9% to \$50.3 million in 1966. The subsidiaries sold 146.2-billion cubic feet of natural gas, for a gain of 6.1% over sales in 1965. Electricity revenues increased 7.8% to \$15 million, on sales of 562-million kwh, which were 13.5% higher than in 1965. Because of increases in costs, particularly a 15% rise in the cost of natural-gas purchases, net income from utility operations declined to \$7.6 million vs. \$7.9 million a year earlier.

Non-utility operations registered excellent over-all growth in 1966. Revenues rose 80% to \$123.2 million, while net income increased by 55% to \$6.2 million. Earnings of the transportation subsidiaries were adversely affected by substantial internal reorganizations, but their relatively poor results were more than offset by strong gains in other fields. The shipping division reported a particularly good earnings gain of 74% over 1965 earnings.

OUTLOOK: Although profits rose by 16% in 1966, earnings available for the common were held at their 1965 level by dividends on the new preferred-stock issue. Management estimates that 1967 earnings will show an impressive gain to about \$2.15 a share vs. \$1.71 a share for 1966. For the years after 1967, the outlook remains extremely promising, in our opinion. The substantial investment portfolio should continue to supply a regular source of interest and dividend income. Meanwhile, successful diversification into non-utility operations is continuing. The dividend rate on the common stock has been increased each year since 1944, and in the past five years payments have averaged 62% of earnings from operations available for the common. We believe that a continuation of increasing dividends as earnings grow is a reasonable exexpectation.
